

# Predict360™ Audit Management Software

Meet every auditing and financial regulatory challenge with a flexible and highly configurable Audit Management Software.

## The Challenges

Increasing complexities in the regulatory environment are driving organizations to seek a holistic and highly integrated approach to manage the entire lifecycle of their audit management processes.

Businesses continue to operate under fluctuating market conditions. Faced with uncertainty, the role of internal audit has increased significantly to include risk management and compliance plus emerging business risks as they adjust to an ever-changing business landscape.

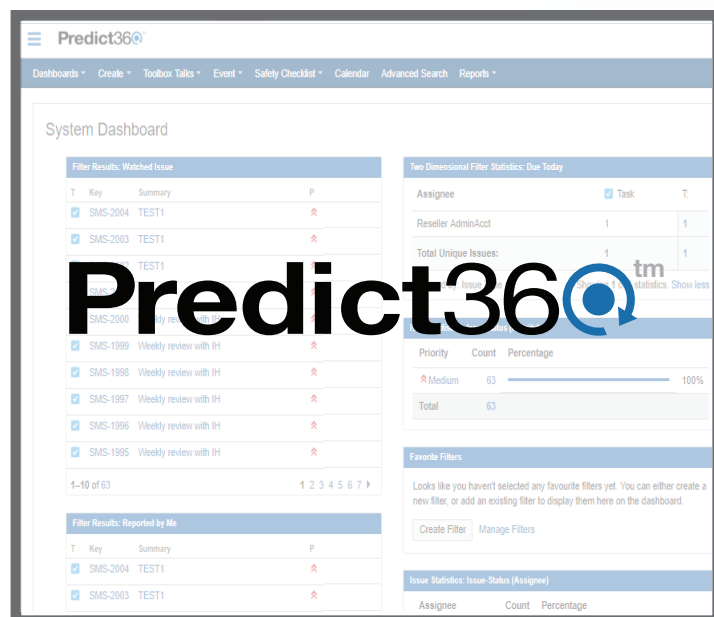

## Our Solution

Predict360™ Audit Management Software is highly configurable and enables organizations to manage their complete audit lifecycle.

It provides end-to-end functionality and is licensable as a standalone web-based application or as part of a highly integrated regulatory change management, risk management, incident, policy, procedures, competency and learning management solution.

## Key Features

- Flexible data-gathering and aggregation framework enables organizations to set up any type and structure of audit imaginable.
- Dynamic logic execution which executes customer specific processes as the result of an audit, survey, gap analysis or inspection.
- Flexible reporting and analytics for enhanced visibility, and smarter and faster decision making.
- Audit questions can be mapped directly to the regulatory and standards requirements as well as the business objectives that drive them which allows unprecedented coverage, extensive reporting, and a comprehensive response to changes in those requirements.
