

Predict360

Environment and Sustainability

Predict360 Environment & Sustainability captures, calculates, analyzes and reports data required for environmental and sustainability reports.

The Challenges

Manual collection, processing and reporting of environmental and sustainability data are complex, time consuming, and error prone.

Current solutions in the marketplace are complex and difficult to use. They were designed by engineers for engineers.

Reporting tools lack business intelligence and analysis capabilities. Data and information cannot be presented in ways that enable rapid assessments and decision making.

Our Solution

Predict360 Environment and Sustainability can manage and report a wide range of data such as air pollutants, greenhouse gasses, water, wastewater, waste, or other sustainability metrics. The software was built with end users in mind. Its intuitive interface leverages the familiarity of a spreadsheet minimizing the learning curve and reducing the configuration effort.

It is the perfect, simple solution to a complex problem faced by many small to medium sized businesses, standalone industrial facilities, and large enterprises in Oil & Gas, Chemicals, Utility, Manufacturing, Healthcare and Transportation industry sectors.

Key Capabilities:

Calculation Engine. Powerful calculation engine with built-in math, date-time, text, and logical functions to handle complex expressions with intuitive user interface. Powerful data aggregation when looking up value that falls in different time span. Add your calculation once and see results immediately without running separate reports.

Dynamic Dashboards. Dynamic dashboards and performance analysis reports which allows you to analyze and compare your data for each source and aggregate results up to the site level. Get data from Predict360 Environment and Sustainability in real time with no need to wait for background processes or cubes to manipulate the data; your data is as real time as you want it to be.

Seamless Integration with Excel. Are you proficient in Microsoft Excel? Do you prefer analyzing your data in Excel? Do you like to use Excel PivotTable and PowerPivot for your reports? Not a problem; just open Excel, point your data source to the data and start working, no additional add-ons or coding needed.
