360factors™

Predict360™
Anonymous Hotline Software

Detect potential violations real time with Anonymous Hotline Software.

The Challenges

Critical to a comprehensive ethics, risk and compliance program is a tool that allows organizations to discover compliance issues and take the necessary corrective and preventive actions.

Complying with the Foreign Corrupt Practices Act (FCPA), SOX and other regulations require a proactive defense mechanism to detect and act on probable violation issues. Responding adequately means going beyond compliance – companies need to demonstrate sound internal controls, procedures, policies and processes to manage potential FCPA violations or harassment complaints.
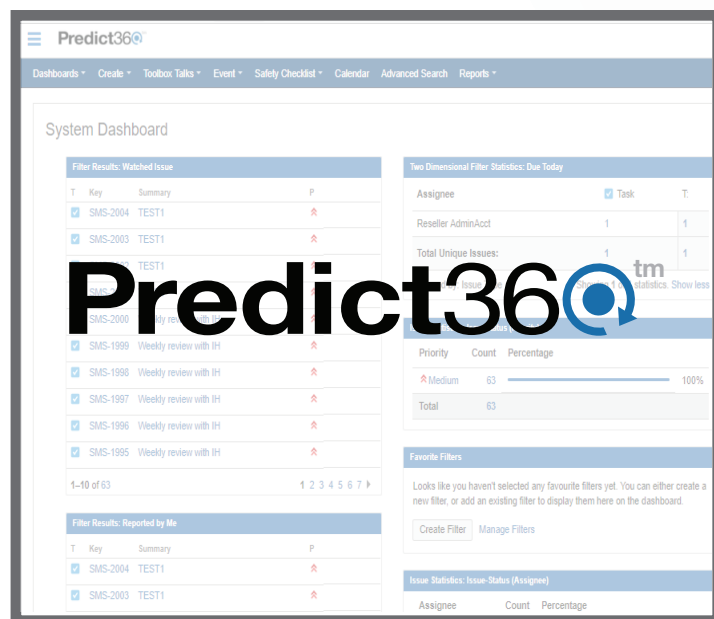

Our Solution

Predict360™ Anonymous Hotline Software provides prompt and valuable insight into potential risks and danger of violations of policies, procedures and controls resulting in noncompliance and cuts in company margin.
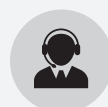

Gain access to integrated reporting and communication tools to elevate accountability and achieve a risk-based culture within the organization.

Key Features

- Provides a single centralized data repository for ethics, risk and compliance management including processes and controls.
- Facilitates collection of incident data, assess risk, and follow up on recommended actions.
- Graphical dashboards, tracking of process ownership, risk assessment, risk analysis and remediation plan.
- Advanced analytical reporting capabilities for micro and macro level visibility into risk exposure enabling qualitative and quantitative trending metrics of potential risks to empower decision making.
