

Predict360™ Enterprise Risk Mgmt Software

Set the risk management foundation with Enterprise Risk Management Software based on Artificial Intelligence.

The Challenges

Every industry faces a unique set of risk mandates and compliance challenges that require close coordination and integration with many related GRC functions including regulatory and standards compliance, incident management, workplace investigations, internal audit, and quality management, among others.

A strategic risk-based approach is critical to navigating business and regulatory compliance in the face of an ever-changing regulatory environment.

Our Solution

Predict360™ provides a fully-integrated ERM solution which enables organizations to identify, quantify, monitor and minimize risks.

It allows businesses to access the environmental, financial, legal, reputational and safety risks at the business unit level and aggregates the enterprise-wide risks.

It enables organizations to better manage risks by tying risk mitigation activities back to the standards, regulations and business requirements that drive them.

Key Features

Integrated risk management methodology, combined with business process workflow and integrated management of change.

Risk assessment surveys for audit-based risk management that help assess risks in all GRC functional areas. Risk/control/audit integration that enables organizations to continuously measure the effectiveness of controls and instigate corrective and preventative actions directly from the analysis and results.
