

# Predict360™ Performance Management System

**Promote goal achievement, productivity and competencies to overall business performance with Performance Management System.**

## The Challenges

- Time-consuming paper-based and manual employee performance appraisal processes.
- Skyrocketing administrative costs and management efforts on top of operational inefficiency.
- Difficulty in translating performance conversations to actual business value.

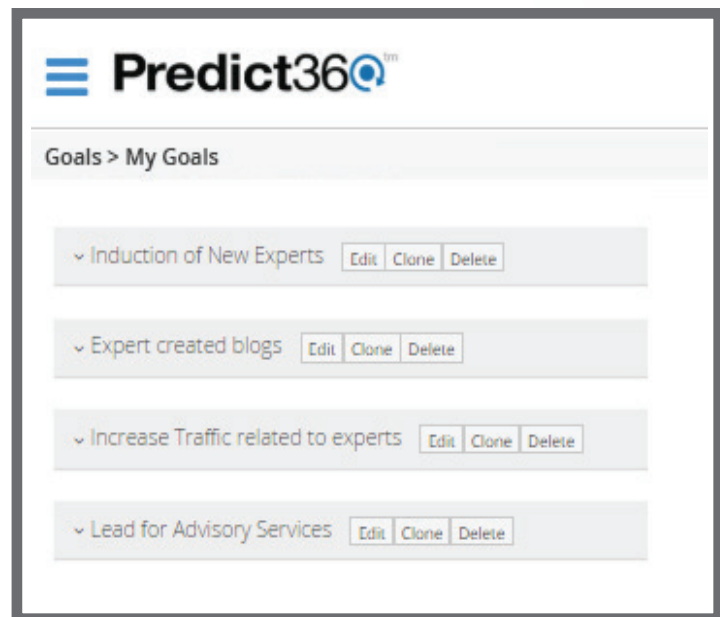

## Our Solution

Predict360™ Performance Management System uses cloudbased technology to enable management to target employee performance and align employee activities with organizational strategy. This equals mutual success for both employees and management.

It automates performance management for increased productivity and profitability. Licensable as a standalone webbased application or as part of an integrated GRC solution, it streamlines the performance appraisal management process to promote goal achievement, productivity, continuous feedback, coaching and development.

## Key Features

- Integrates your data in one system and provides the most robust employee data in view for managers and their employees.
- Highly configurable dashboards make goal-setting easy and transparent, giving managers and their employees the best snapshot of how their performance and progress towards achieving their goals.
- Aligns individual goals to organizational goals for a proactive goal management.
