

Predict360tm Vendor Management Software

Proactively manage your vendor risks and contract compliance management process with Predict360tm Vendor Management Software.

The Challenges

Most organizations deal with vendors to some extent. Managing relationships and agreements with multiple third-party vendors and contractors can get very complex very quickly. In some cases, regulations are in place that require due diligence to minimize third-party risk exposure.

The increased regulations on organizations has significantly increased requirements for the management of third party compliance. Ensuring that the products and services provided by third-party service providers are safe and comply with applicable laws, regulations and standards is a responsibility of senior

Our Solution

Predict360tm Vendor Management Software allows you to centralize your data and records. Companies no longer have to rely on spreadsheets and word processing tools as these prove inefficient in meeting the stringent requirements of the auditors. The best way to manage vendors is with vendor management software. Organizations can document their agreements and track their billing processes and order distribution. It also provides the ability to manage risk and analyze the effects of vendor relationships on the organization's risk index.

Key Features

- Vendor management software enables you to efficiently manage your vendor risks and contracts and prevents it from oversight through a complete and centralized vendor management process.
- It provides the ability to centralize vendor management process – all your suppliers, procurements, contracts and reviews in one place.
- Tracks and monitors your contracts and other vendor documents. You can also assign access rights and roles to different users in the system depending on their respective responsibility.
